

## Off-Grid Solar Power

[Dragon's Breath Solar](#)

---

**Solar** is an enterprise included in the dragon's breath solar business.

This involves helping customers understand how to size and establish renewable energy projects to reduce the long-term costs of buying electricity through diesel generators.

**Correctly** installed an off-grid solar PV system will return enough power to support any remote application using power each year; it also reduces the need to be dependent on paying the rising costs of fuels.

**Costs** dictate that this organic approach of generating power will substantially reduce costs of powering electricity each year.

**Company** based in West Wales, where staff and family members work together as a strong team of 7 employees.

**Services** can be between 1 & 16 panels either being DC or 230VA. Ground or roof mounted for domestic customers.

**Locations** Usually [off-grid solar is for rural locations](#), where normal mains powered supplies are not available due to locational restrictions. Depending on the sites ability to utilize solar gain, we will offer equipment parts to allow DIY installations.

**Contact us** for any quotation advice to achieve a green lifestyle with annual power supply income for the next 20 years.
