

Dragon Parkland Solar Light DBS165m

Parkland Solar Light System, DBS165m is designed for medium footfall illumination in rural UK locations, offering maintenance-free solar-powered lighting to parkland solutions.

Product Overview The parkland light system provides illumination using solar energy stored in high-performance lithium phosphate batteries, suitable for remote areas, where lighting is needed when required.

Design and Features The system features a low voltage LED with high color rendering temperature of 3000-4000K, and a wide beam spread. The medium solar panel, is mounted on top of luminary, and can be oriented to maximize available sunlight capture, pointing south. IP65 protected, weighs 12kg, and includes, automatic charge regulation, c/w 60-month warranty.

Operational Functionality Each unit is commissioned prior to arriving on site, automatically switching on at sunrise to charge and off at sunset ready to illuminate when required. This parkland system is fully automated, requiring only annual cleaning of the 100m solar panel, and operates reliably year-round.

Applications This is a medium use system, suitable for diverse locations such as pathways, and walkways.
